PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of experience designing, developing, and maintaining scalable web applications using Python, Django, and React. Experienced in backend optimization, REST API development, database design, and modern frontend development. Proficient in cloud services (AWS) and deployment tools such as Docker and Nginx, with a proven track record of integrating complex systems to improve operational efficiency and user experience. Strong analytical and problem-solving skills with a focus on delivering high-quality solutions in collaborative environments.

PROFESSIONAL EXPERIENCE

Stackerbee Technologies Feb 2025 – Sept 2026
Python Full Stack Developer

- Built BIOGATE, a Gym Management SaaS Platform, with Django and React.js:
  * Developed multi-tenant architecture supporting white-label deployments
  * Implemented membership management, class scheduling, and subscription billing
  * Designed RESTful APIs with JWT authentication and role-based access control
  * Utilized PostgreSQL for efficient data storage and retrieval
- Built AJP Hospitality, a Hospitality and Guest Service Automation Platform, using Django and React.js:
  * Implemented modules for room booking, chauffeur service, medical assistance, and food & beverage management with seamless workflow integration
  * Built a responsive and customizable frontend using React.js and Tailwind CSS
  * Utilized PostgreSQL with optimized queries to ensure reliable data storage and high performance
  * Designed role-based access control with separate dashboards for admin, staff, and guests
- Built AJP Automotive, an Automotive Service and Vehicle Management Platform, using Django and React.js:
  * Developed a full stack automotive management platform using React.js (Vite), Django REST Framework, and PostgreSQL
  * Built responsive, modern user interfaces with Tailwind CSS, ensuring cross-device compatibility
  * Implemented modules for vehicle listings, service management, customer inquiries, and appointment scheduling
  * Implemented authentication and role-based access control for admin and staff management
  * Improved application performance through reusable React components and optimized API handling
  * Managed deployment, domain configuration, and production server setup for live hosting
- Engineered a complete Warehouse Management System (WMS) with React.js:
  * Component-based architecture maximizing reusability
  * Performance-focused bundle optimization
  * Full inventory lifecycle management features

Vedha Info-Systems Aug 2024 – Dec 2024
Junior Python Developer

- Collaborated with cross-functional teams to design, develop, and deploy high-quality Django applications and RESTful APIs following industry best practices for data protection
- Developed and deployed 3+ production-ready web applications implementing:
  * RESTful API development with Django REST Framework
  * PostgreSQL database design and optimization
  * Responsive frontend interfaces with React.js and Material UI
- Implemented core features including user authentication, payment gateways, and real-time updates

INDEPENDENT PROJECTS

Topline Integrated Services – Business Solutions Platform

- Developed a Next.js frontend optimized for SEO performance and fast client-side navigation
- Built a Django backend to manage dynamic content, service listings, and contact form submissions
- Implemented role-based access control with separate admin dashboards for managing services, blogs, and media content

- Ensured responsive design and smooth user experience across devices using Tailwind CSS
- Deployed on AWS EC2 with Nginx for high availability and scalability

Al-Dar Car Rental – Web Platform

- Built a Django backend to manage car inventory, bookings, expenses, and income tracking
- Created a role-based admin dashboard with sections for cars, expenses, income, and analytics
- Ensured secure authentication and authorization for admins and staff using JWT
- Configured AWS EC2 deployment with Nginx load balancing

Pixel-Hub – E-learning Platform

- Built with a Python Django backend, React frontend, and PostgreSQL database
- Integrated Stripe payment processing and real-time chat using WebSockets
- Deployed on AWS EC2 with Nginx configuration for optimal performance

TECHNICAL SKILLS

- **Programming:** Python, JavaScript
- **Frontend:** React.js, Next.js, HTML5, CSS3, Tailwind CSS, Material UI
- **Backend:** Django, Django REST Framework, Node.js, Express.js
- **Databases:** PostgreSQL, MongoDB
- **DevOps & Cloud:** Docker, AWS (EC2, S3), Nginx
- **Web Technologies:** REST APIs, WebSockets, JWT Authentication
- **AI Tools & Technologies:** Claude AI, Antigravity, v0.dev, AI Integration APIs
- **Version Control:** Git, GitHub

EDUCATION

Bachelor of Technology (BTech) in Computer Science and Engineering 2015 – 2019
APJ Abdul Kalam Technological University | CGPA: 6.23

Higher Secondary Education, Computer Science 2013 – 2015
JNMGHSS Vadakara | 87.75%
